About This Game

A diorama is NOT a game, nor is it a demo. Simply put, a diorama is a painting you can visit with a simple goal of inspiring a sense of wonder. They are an ideal retreat to 5d3b920ae0

Title: Diorama No.1 : Blocked In

Memory: 4 GB RAM

English

This is a great Tetris dream.. The previous timer based progression system is now gone, so I can take out my previous complaints! :) This diorama (and the others in the series) do a nice job of giving you a scene to experience. The miniature diorama menu itself is great, a really unique way of doing a level select in VR.. OK experience, I dunno if the price was worth it. If you are a type of person who wants to interact with objects, etc. Then this game is not for you. Super boring game and a waste of your time.. Blocked In diorama was made first for Rift DK1. This was probably the best demo in the early days of VR. VR games has since advanced, but this little diorama is still as charming as ever. I can only recommend it.. Kind of like an

interactive painting, but without much interacting except for moving around the space. It's nice to just boot up and sit and listen to the radio or the game music as blocks slowly fall in and out of frame, casting shadows into the room. \$1.99 isn't too bad for all the love and care you can see went into this Diorama. Curious where #2 is though. May look into buying #3. Keep up the good work! Loved the little box diorama that came before the actual Blocked In room.. Nice to demo VR to people.. Nice experience, although I think the best scene is the first one, where you can walk around the room and look out the window.
